1. Bug Tracker Board Created

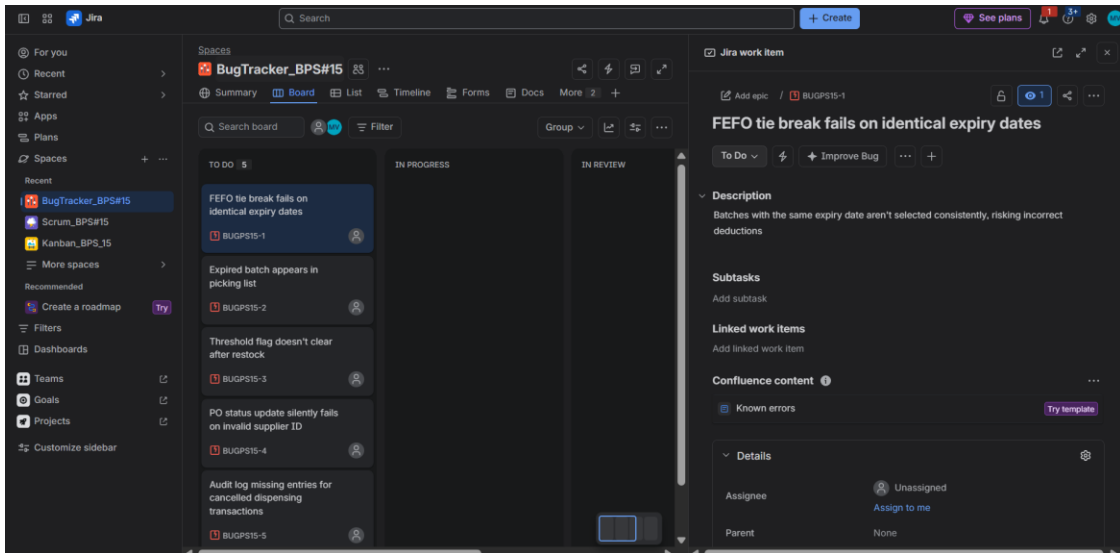

BugTracker_BPS#15 board created with all 5 reported bugs added to the To Do column, covering the Pharmacy Expiry and Re-order Dispatch Engine (PS#15).

2. Priorities Assigned

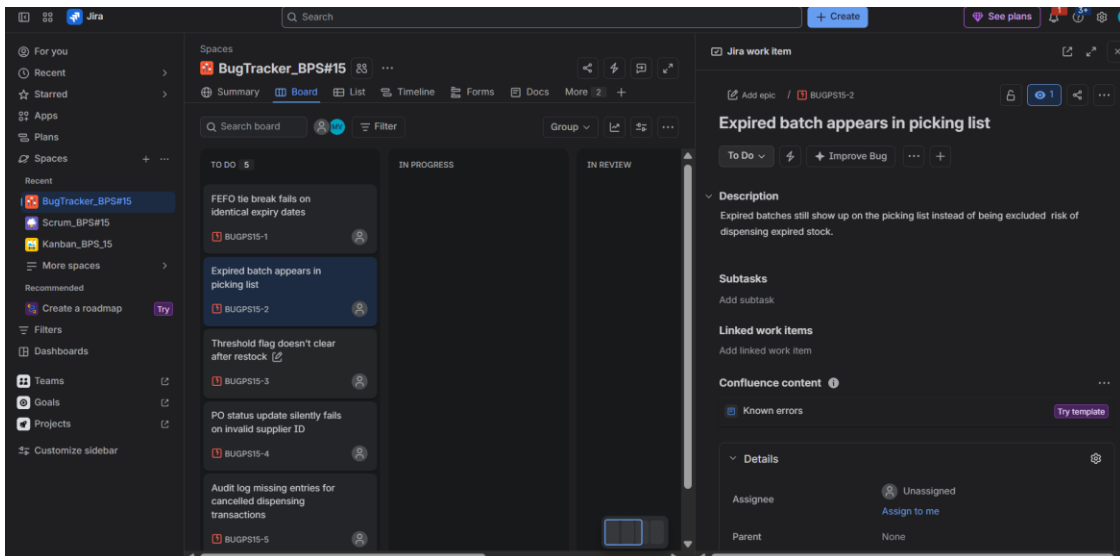

List view showing all 5 bugs with severity/priority assigned: Highest for the expired-batch defect, High for the FEFO tie-break and PO update issues, and Medium for the threshold-flag and audit-log gaps.

3. Description Added — BUGPS15-1

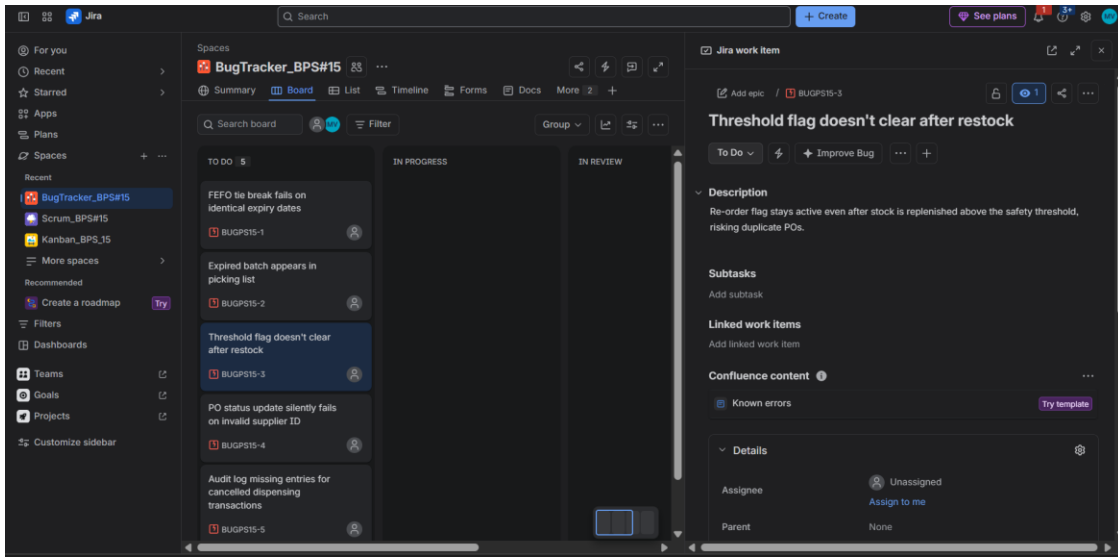

BUGPS15-1 (FEFO tie break fails on identical expiry dates): batches with the same expiry date aren't selected consistently, risking incorrect deductions.

4. Description Added — BUGPS15-2

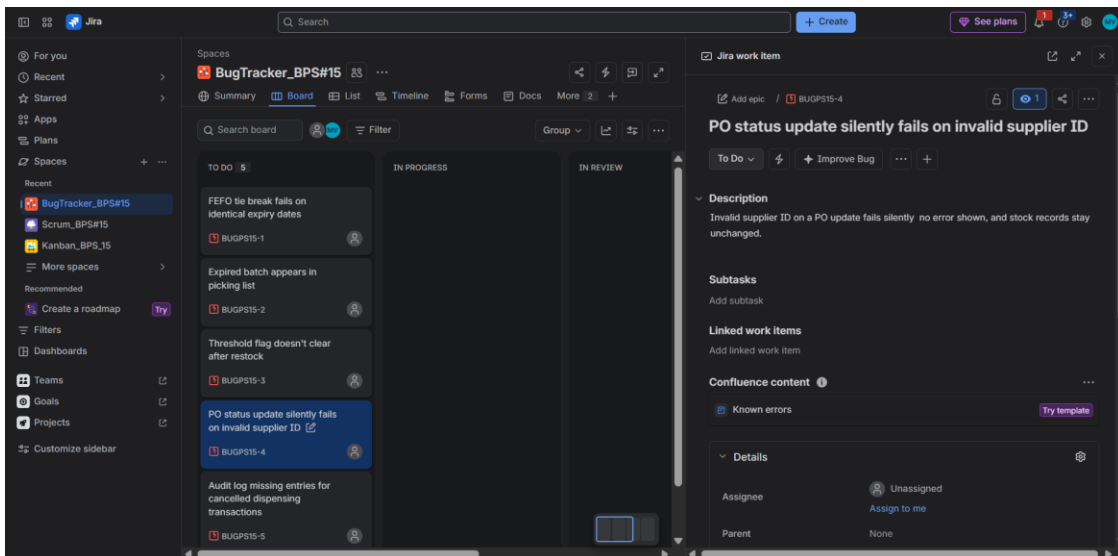

BUGPS15-2 (Expired batch appears in picking list): expired batches still show up on the picking list instead of being excluded risk of dispensing expired stock.

5. Description Added — BUGPS15-3

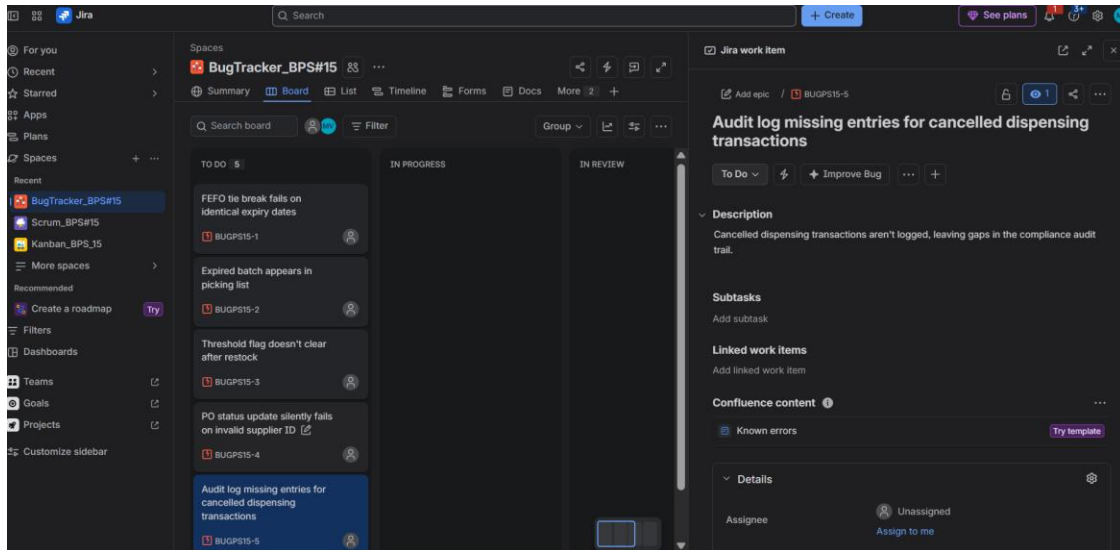

BUGPS15-3 (Threshold flag doesn't clear after restock): re-order flag stays active even after stock is replenished above the safety threshold, risking duplicate purchase orders.

6. Description Added — BUGPS15-4

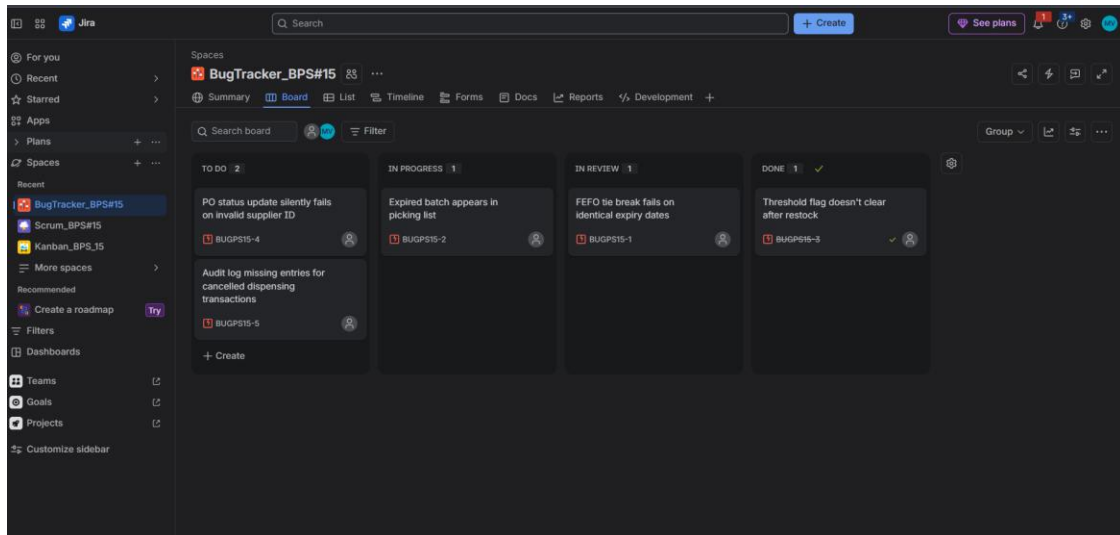

BUGPS15-4 (PO status update silently fails on invalid supplier ID): invalid supplier ID on a PO update fails silently no error shown, and stock records stay unchanged.

7. Description Added — BUGPS15-5

BUGPS15-5 (Audit log missing entries for cancelled dispensing transactions): cancelled dispensing transactions aren't logged, leaving gaps in the compliance audit trail.

8. Final Board — Bugs Across All Statues

Final board state showing the full bug lifecycle in action: 2 bugs in To Do, 1 In Progress, 1 In Review, and 1 Done demonstrating bugs moving from report through to resolution.
