

Manasi Vipin_PES1UG24CS260-BPS#15

Step 1 — Board Populated with FRs and NFRs

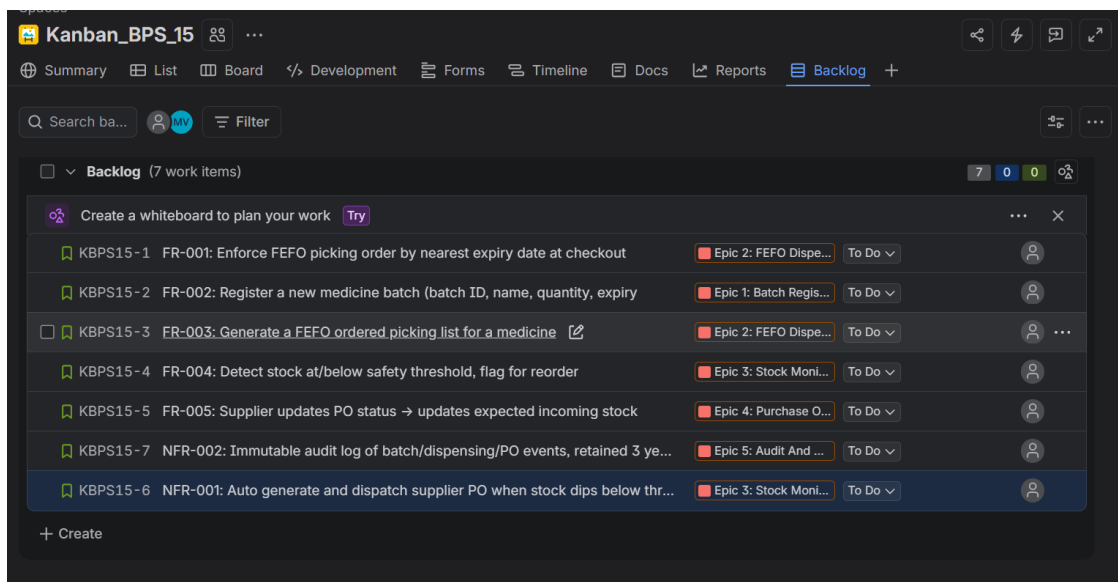

The Kanban_BPS_15 board's To Do column populated with all 5 Functional Requirements (FR-001 to FR-005) and both Non Functional Requirements (NFR-001, NFR-002) as Story type work items.

Step 2 — Epics Created

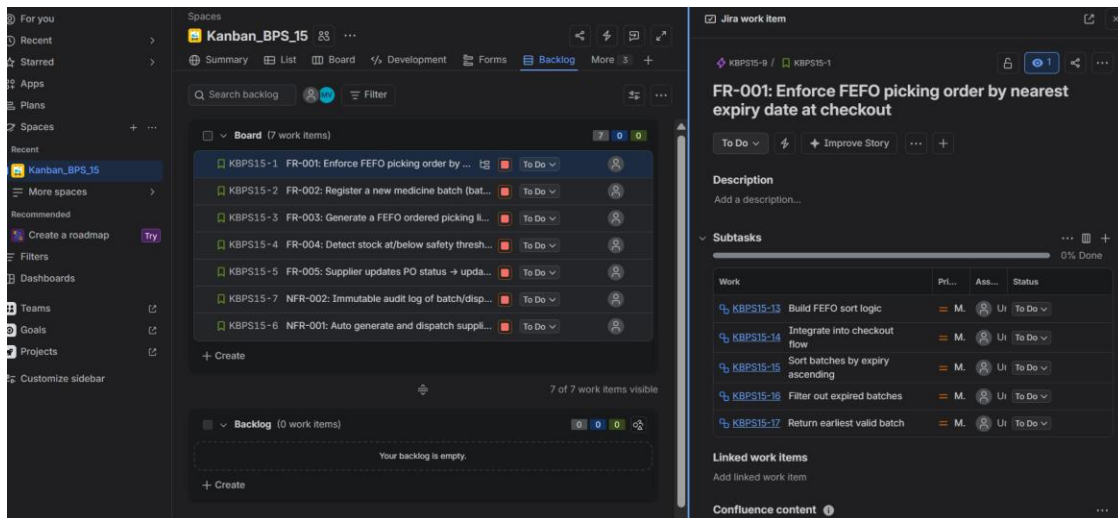

All 5 Epics created to represent the major functional themes of the system: Epic 1 (Batch Registration & Inventory Management), Epic 2 (FEFO Dispensing & Picking), Epic 3 (Stock Monitoring & Re-order Automation), Epic 4 (Purchase Order Fulfillment), and Epic 5 (Audit & Compliance Logging).

Step 3 — Stories Linked to Epics

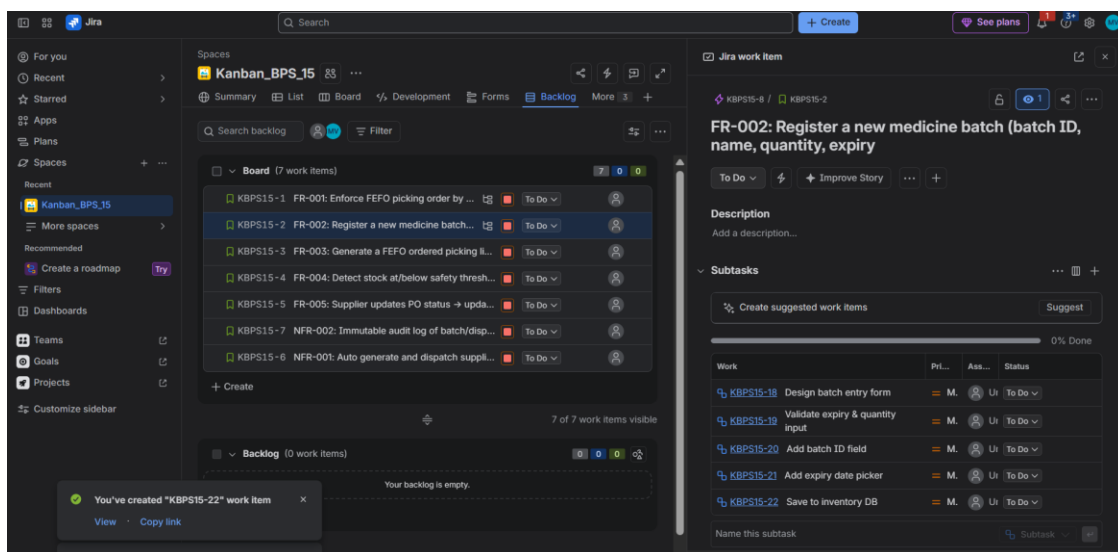

Backlog view showing each of the 7 Stories (FR/NFR items) linked to its parent Epic via the Parent field, establishing traceability between individual requirements and their functional theme.

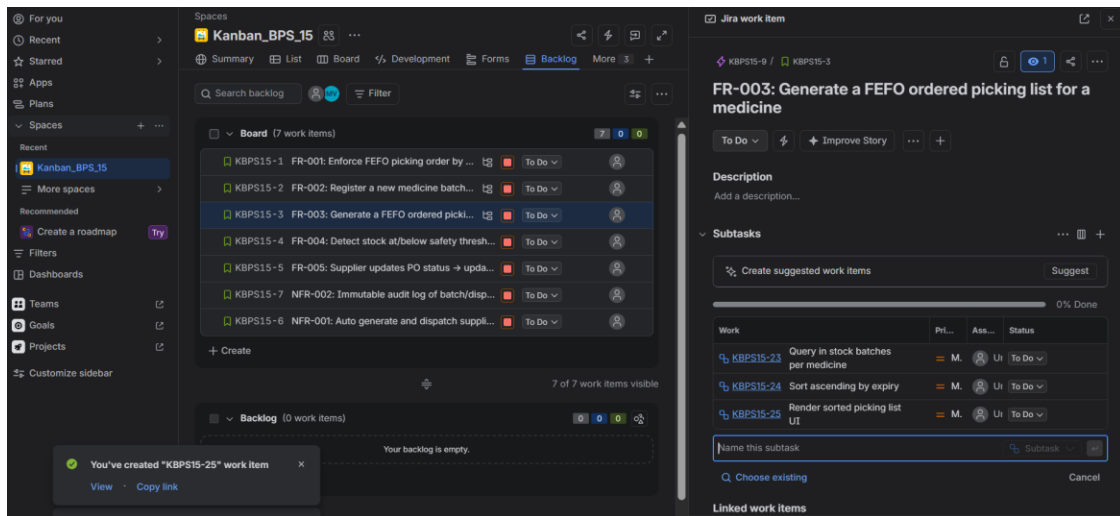

Step 4 — Subtasks for FR-001,002,003,004,005

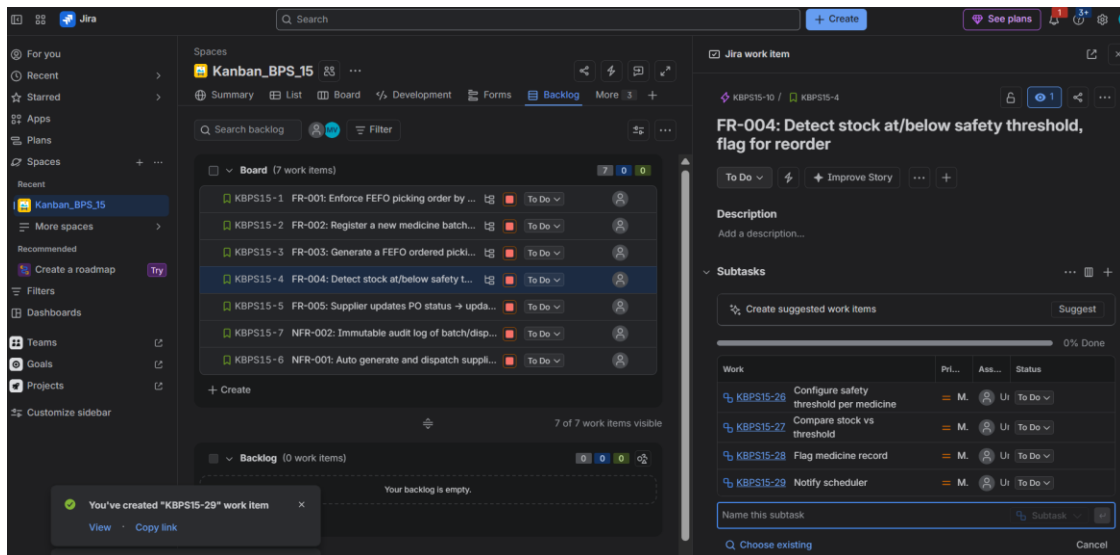

FR-001 (Enforce FEFO picking order) broken down into 5 subtasks: Build FEFO sort logic, Integrate into checkout flow, Sort batches by expiry ascending, Filter out expired batches, and Return earliest valid batch.

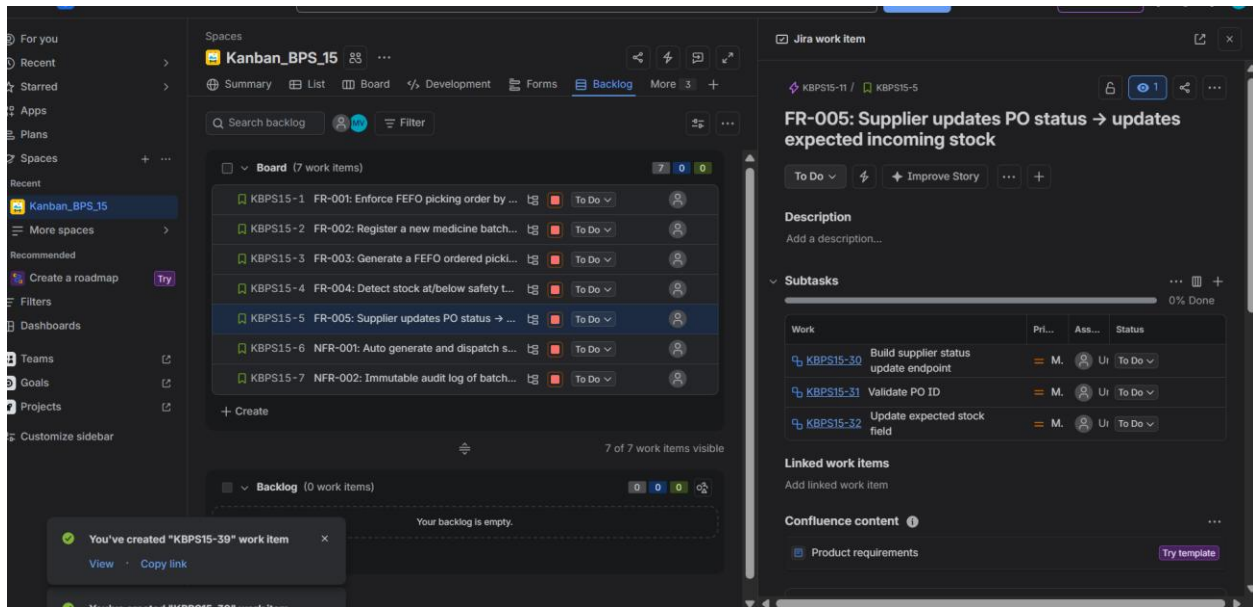

FR-002 (Register a new medicine batch) broken down into 5 subtasks: Design batch entry form, Validate expiry & quantity input, Add batch ID field, Add expiry date picker, and Save to inventory DB.

FR-003 (Generate a FEFO ordered picking list) broken down into 3 subtasks: Query in-stock batches per medicine, Sort ascending by expiry, and Render sorted picking list UI.

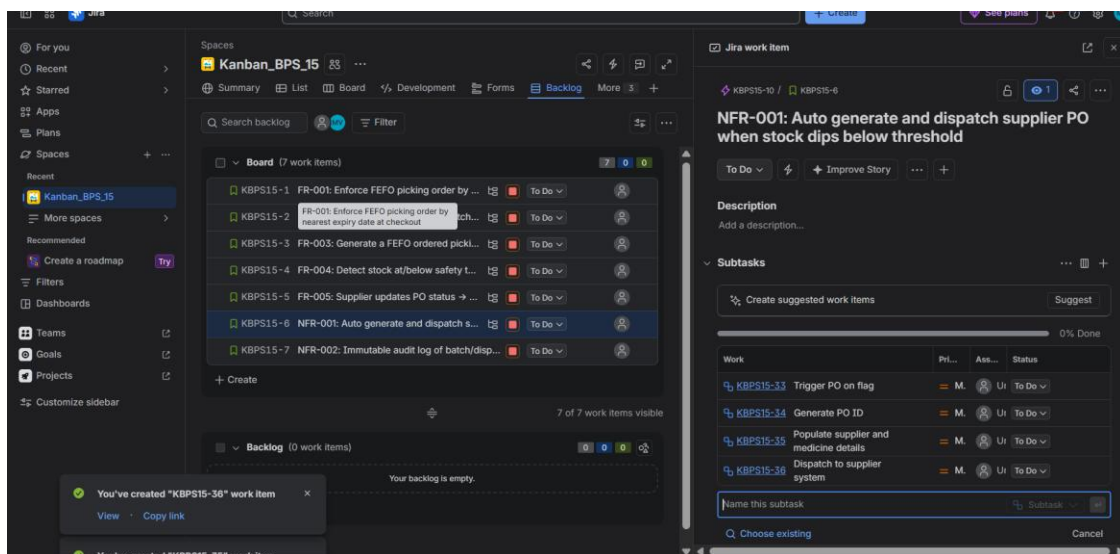

FR-004 (Detect stock at/below safety threshold) broken down into 4 subtasks: Configure safety threshold per medicine, Compare stock vs threshold, Flag medicine record, and Notify scheduler.

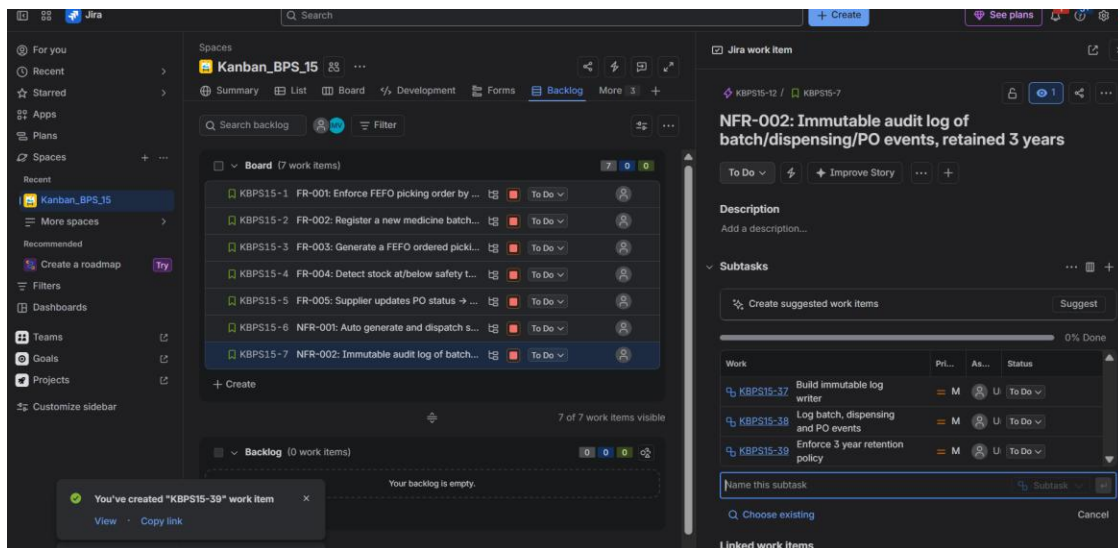

FR-005 (Supplier updates PO status → updates expected incoming stock) broken down into 3 subtasks: Build supplier status update endpoint, Validate PO ID, and Update expected-stock field.

Subtasks for NFRs

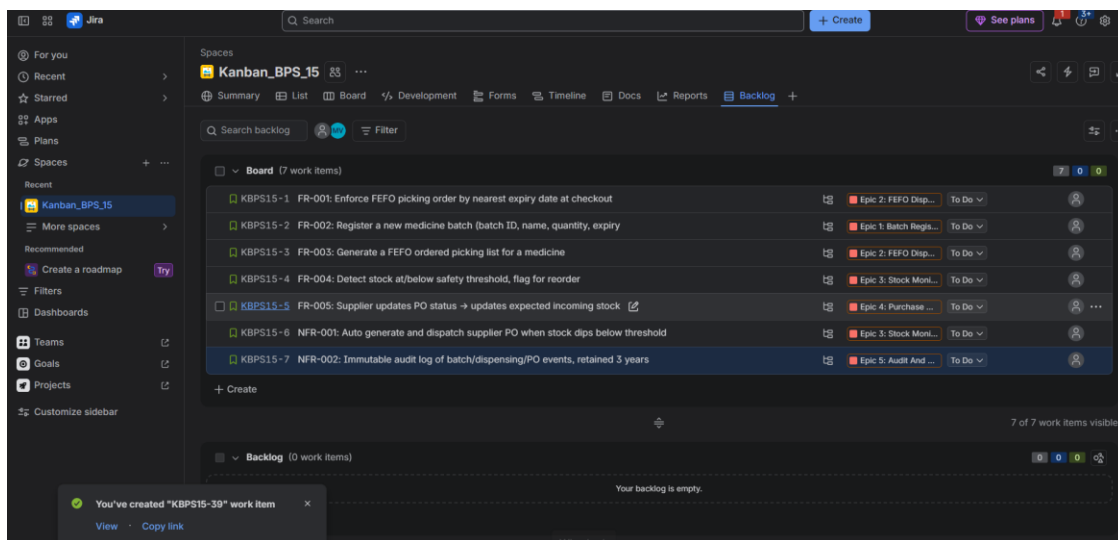

NFR-001 (Auto generate & dispatch supplier PO) broken down into 4 subtasks: Trigger PO on flag, Generate PO ID, Populate supplier & medicine details, and Dispatch to supplier system.

NFR-002 (Immutable audit log) broken down into 3 subtasks: Build immutable log writer, Log batch/dispensing/PO events, and Enforce 3 year retention policy.

Step 5 — Final Backlog with Epics Assigned

Final Backlog view showing all 7 Stories (5 FRs + 2 NFRs), each assigned to its corresponding Epic, providing a complete and traceable view of all planned work for the Pharmacy Expiry & Re-order Dispatch Engine.
